Q-SYS UC Compute Bundle for Microsoft Teams Rooms

The Q-SYS Microsoft Teams Room UC Bundle brings together Lenovo room compute solutions with Q-SYS audio, video, and control, making the process of purchasing and implementing complete UC systems in high-impact collaboration spaces as scalable and seamless as possible.

BENEFITS

The Power of Partnerships: Q-SYS and Lenovo present an impressive Microsoft Teams Room solution, merging best-in-class compute capabilities alongside Q-SYS industry-leading Audio, Video and Control processing, providing customers with a single-vendor purchasing workflow to deliver an intuitive and scalable UC room system experience from the simplest of room types to any high-impact space.

Holistic AV Experience: Q-SYS is a software-based audio, video and control platform that lets you deliver a holistic user experience in high-impact spaces. From room automation and automatic multi-camera switching to HDMI video distribution and beyond, Q-SYS is uniquely customizable to the needs of the space.

Enabling Complete Microsoft Teams Rooms

Solution: Optimize your Microsoft Teams Rooms experience with a complete room solution. The bundle includes a Lenovo compute and controller with the Q-SYS Control for Microsoft Teams Rooms application pre-installed, enabling simplified AV and call controls on a single device. With the largest selection of Microsoft Teams Rooms certified products, you can customize the solution to suit your needs, no matter the space.
